

CLIMATE CERTIFICATE 2008

CO2focus' Climate Certificate™ is hereby issued to **CO2focus AS** which has been verified according to the ACAM® model and has compensated for the company's CO₂ emissions. The carbon footprint has been calculated according to the principles of The Greenhouse Gas Protocol (GHG Protocol). **CO2focus AS** has due to this purchased UN issued emission credits equivalent to a total amount of **18 ton CO₂**.

The emission credits are issued by UN and called CER (Certified Emission Reduction). These are part of the Kyoto Protocol's mechanism to combat global warming, called the Clean Development Mechanism. A CER is an official emission credit which guarantees the reduction of greenhouse gas emissions and also supports sustainable growth in developing countries. When a CER is issued the reduction in greenhouse gas emissions has already taken place. By purchasing CERs **CO2focus AS** is funding the reduction of GHG emissions equivalent to the face value of this certificate.

For more information about emission credits and what specific project this certificate is linked to, please see <http://cdm.unfccc.int/Projects/DB/DNV-CUK1135673240.22/view> project **no. 0198** or www.co2focus.com

Oslo, June 2008

A handwritten signature in black ink that reads "Jan Willy Elmenhorst-Larsen".
