Corporate Social Responsibility Policy 08

EcoSecurities is a pioneering carbon credit company whose core purpose is to invest in projects which are aimed at reducing the volume of greenhouse gases emitted into the atmosphere thus preventing or reducing the negative impacts of climate change.

Our vision is to make a positive and lasting difference to the environment, the people with whom we do business, and the global community as a whole. We aim to achieve this by consistently applying the principles of sustainable development throughout our business and ensuring that we do not lose sight of our principles, values and beliefs.

Rajawali Nusranta Biodiesel project, Indonesia

For us corporate social responsibility means applying our principles day-to-day. We believe in 'keeping it real', and aim to ensure that our principles can be put in practice in the company and to those that deal directly with us. In practice this means:

Minimising the impact of our operations on the environment –

to achieve this objective, we will aim at reducing our greenhouse gas emissions by introducing energy efficiency measures, promoting the use of clean or public transport, purchasing renewable energy, increasing recycling and use of recycled materials, and adopting procurement policies that favour sustainably-produced goods. A central component of our CSR is the objective to achieve carbon neutrality of most components of our operations, through offsetting our greenhouse emissions by promoting emission-reduction projects in developing countries.

Assisting our clients in minimising the environmental impacts of their operations –

this will be done by ensuring that the projects which we promote conduct environmental impact assessments, so that any negative impacts on the environment can be minimised. Whenever feasible, we will use our influence to promote the adoption of modern and cleaner technologies. Additionally, we aim to encourage our clients and suppliers to adhere to the same principles and values that we adopt ourselves.

Seeking to form a highly diversified and prepared work force –

as EcoSecurities is a company promoting sustainable development in a variety of countries, we strongly believe that the best way to achieve this is through employing a diverse and talented workforce with a high degree of cultural awareness and knowledge of local issues and that, in the long term, they can disseminate and retain these values and expertise in their own countries. Our employment policies actively value and promote diversity in terms of gender, age, ethnicity, culture, sexual orientation, nationality, religion and local practices.

La Esperanza Hydroelectricity project, Honduras

Ensuring the welfare, wellbeing and equality of rights of our employees –

by providing a safe and healthy working environment, and ensuring equality of treatment and fair employment practices.

Encouraging the adoption of good social standards among those with whom we do business –

by promoting good labour standards throughout our supply chain; sourcing fair traded goods and services and adopting and promoting fair trade practices and products; ensuring an honest and fair treatment of our clients and suppliers; and refraining from working with clients or in countries which do not recognise human rights principles.

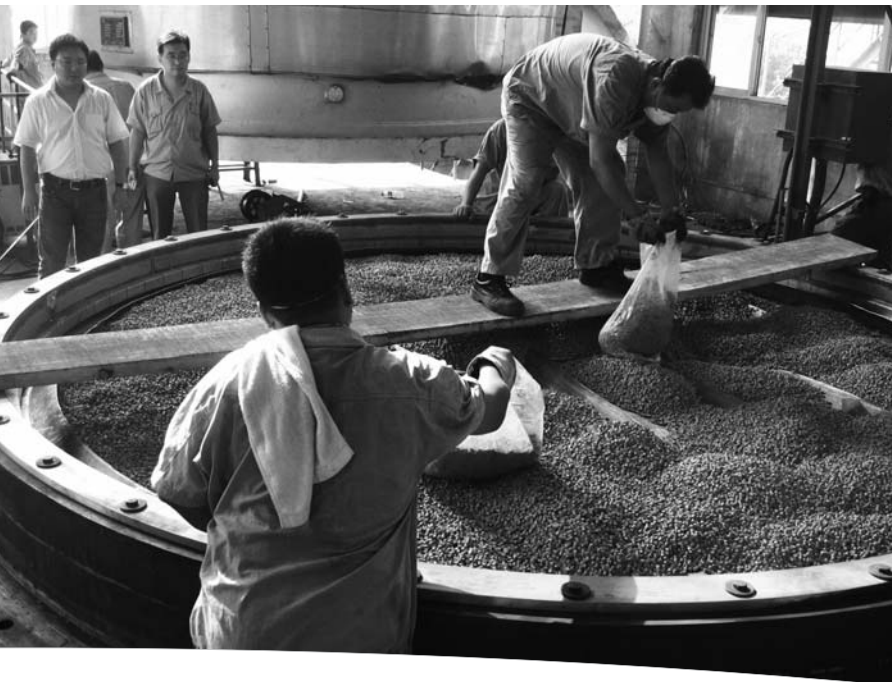

El Panul Landfill gas to energy project, Chile

Protecting the short and long-term interest of our investors –

through the consistent adoption of these principles across the business, as well as keeping open and honest communications with investors and other stakeholders, managing risks, and nurturing and preserving our good reputation.

We want our commitment to Corporate Social Responsibility to be evident to everyone that we do business with, and we will aim to encourage them to adopt similar values. It is our hope that our actions alone will do this. Beyond this, we will continuously evaluate and seek to improve the effectiveness of our social and environmental performance and openly share this with anyone who has an interest in the long-term success of our business.

Through the adoption of our CSR Policy & Aims, EcoSecurities hopes to extend the positive values that it nurtures to all its employees, anyone with whom it conducts business with and anyone that is affected by our activities in a broader way.

Tianji N₂O abatement project, China
