Dear Olivier,

Good day to you

The document UNEP/GCSS/X/7: Waste Management for the 10th special session of the UNEP Governing Council was very informative. There were many interesting facts on waste management and I believe the document was well prepared and precise in its output. The emphasis on raising environmental awareness about this issue is important and it is well highlighted in UNEP's document.

I feel the community based organizations and NGO's need more support at both national and international level. I would strongly recommend to emphasize and bring forth the work done by these organizations in the Asian region. There are many successful case studies in the Asian region including the UAE where a lot of work has been done by NGO's such as EEG and we would recommend that UNEP highlights this in its reports.

Wish you all the best in finalizing this report.

Please revert for any further information you may require.

Thanking you
Best Regards,
