

Please find attached the comments of the Gender and Water Alliance to the draft of the "Guidelines for Enhancing Major Groups Participation at UNEP's Governance Level".

GWA appreciates the work that has been done, leading to a concise and readable draft. However, we think an organogram would enhance the comprehension of the suggested structures. Would it be possible to include this in the next draft?

If there are any questions or unclarities in our comments provided, please let us know.

Kind regards,

Esther de Jong
