

Acknowledgements

The lead author and coordinator would like to thank the regional Task team and experts who contributed to this report through their participation and the material they have prepared for the two workshops.

Special thanks are also due to:

- Mr Amadou Saine and Moustapha Demer for the preparation of the Causal chain and Policy option analysis for the overexploitation of fish in the Canary Current;
- Prof. Tayed Ameziane and Abdelaziz Sbai who helped in the preparation of the Causal chain and Policy options analysis for Lowering of the water table in the Souss-Massa River Basin;
- Mr Gora Ndiaye who prepared the part concerning the Causal chain and Policy options for Streamflow modification in the Senegal River Basin;
- The peer reviewers of this report, including the GIWA Core team and regional coordinators;
- The GEF, University of Kalmar, the GIWA Core team, UNEP and Sida for providing the funding and technical support required to undertake this study.

Finally, in writing this report, reference has been made to a number of publications as well as unpublished material. We are highly indebted to all the authors.
