LIST OF ILLUSTRATIONS

Chapter 1 Environment for Development

Figure 1.1 Ratification of major multilateral environmental agreements	9
Figure 1.2 Number of people affected by disasters of natural origin in SIDS	18
Figure 1.3 Pollutants paths to the Arctic	20
Figure 1.4 Population by region	21
Figure 1.5 Life expectancy by region	22
Figure 1.6 Urban population by region, per cent of total population	22
Figure 1.7 Gross domestic product – purchasing power parity per capita	24
Figure 1.8 Primary energy supply per capita	27
Figure 1.9 (a) Mobile phones, per 1 000 people and (b) Internet users, per 100 people, by region	28

Chapter 2 Atmosphere

Figure 2.1 Selected pollutants, their average residence times in the atmosphere and maximum extent of their impact	43
Figure 2.2 Energy use per US\$1 000 GDP (in PPP for 2000)	46
Figure 2.3 Total primary energy supply by energy source	46
Figure 2.4 Number of passenger cars, by region	47
Figure 2.5 Activity intensity versus per capita personal car use in 58 higher income metropolitan areas around the world	47
Figure 2.6 Amount of space required to transport the same number of passengers by car, bus or bicycle	48
Figure 2.7 Premature deaths due to outdoor urban PM ₁₀ exposure by region in 2000	52
Figure 2.8 Emissions of (a) sulphur dioxide and (b) nitrogen oxides, by region	52
Figure 2.9 Trends in average annual urban concentrations of pollutants (µg/m ³) in selected cities worldwide	53
Figure 2.10 Estimated annual average concentrations of PM ₁₀ in cities with populations greater than 100 000, and in national capitals, for 1999	53
Figure 2.11 Calculated annual average tropospheric ozone concentrations in 2000 obtained by combining the outputs of several models	54
Figure 2.12 Global estimates of disease attributed to (a) indoor and (b) urban PM ₁₀ pollution, measured in DALYs	55
Figure 2.13 The impact of local air pollution on the growth of wheat in suburban Lahore, Pakistan	56
Figure 2.14 Global distribution of sulphur levels in diesel fuel in 2007	58

Figure 2.15 Atmospheric concentrations of CO ₂ over the last 10 000 years	60
Figure 2.16 CO ₂ emissions from fossil fuels by region	60
Figure 2.17 Per capita CO ₂ emissions at the regional level in 2003	61
Figure 2.18 Observed warming over the 20th century compared with climate model calculations	61
Figure 2.19 The (2000–2005) global carbon cycle	62
Figure 2.20 Seasonal melting of the Greenland Ice Sheet	63
Figure 2.21 Time scales and sea-level rise	64
Figure 2.22 Paths to reach a 400 ppm CO ₂ -equivalent greenhouse gas concentration target (Kyoto gas emissions plus land use CO ₂)	66
Figure 2.23 Size of the Antarctic ozone hole over time	69
Figure 2.24 Worldwide consumption of CFCs and HCFCs	70
Figure 2.25 Effect of international agreements on the predicted abundance of ODS in the stratosphere 1980–2100	71
Figure 2.26 Progress of leaded gasoline phase out in sub-Saharan Africa	73

Chapter 3 Land

Figure 3.1 <i>Green and blue water</i> , global flows	84
Figure 3.2 Total forest area by region	89
Figure 3.3 Primary forest area by region	89
Figure 3.4 Designation of forests by region, 2005	90
Figure 3.5 Declines in carbon in living biomass and in extent of forest	90
Figure 3.6 Global land degradation using biomass production and rain-use efficiency trends between 1981–2003	92
Figure 3.7 Kenya land use, biomass and rain-use efficiency	93
Figure 3.8 PCDD (dioxin) in the atmosphere and deposition, 2003	94
Figure 3.9 Drylands – defined by the long-term mean of the ratio of annual precipitation to potential evapotranspiration	107
Figure 3.10 Trends in greenness index in the Sahel, 1982–1999	108
Figure 3.11 Arable land and area under cereals	110

Chapter 4 Water

Figure 4.1 Global distribution of the world's water	118
Figure 4.2 The Global Ocean Conveyor	119
Figure 4.3 The situation in relation to (a) drinking water and (b) sanitation coverage, 2004	120
Figure 4.4 Changes in global water use by sector	121
Figure 4.5 Annual precipitation trends, 1900–2000	126

Figure 4.6 Global glacier mass – annual variability and cumulative values	127	Figure 6.6 Changes in sectoral shares in employment in sub-Saharan Africa	206
Figure 4.7 Reported cholera cases and fatalities by region	132	Figure 6.7 Examples of current and possible future impacts and vulnerabilities associated with climate variability and change in Africa	207
Figure 4.8 Inorganic nitrogen levels per watershed by region, 1979–1990 and 1991–2005	133	Figure 6.8 Per capita arable land	208
Figure 4.9 Algal blooms in the East China Sea	134	Figure 6.9 Countries in crisis requiring external food assistance (October 2006)	211

Box 6.20 Energy supply and consumption patterns	241	Box 7.4 Contamination in Central Asia's Ferghana-Osh-Khudjand area	320
Box 6.21 Regional participation in global multilateral environmental agreements (MEAs)	242	Box 7.5 Analysing different types of vulnerability in drylands	323
Box 6.22 Cultural diversity, traditional knowledge and trade	246	Box 7.6 Institutional reform for poverty alleviation in drylands	326

Chapter 4 Water

Table 4.1 Linkages between state changes in the water environment and environmental and human impacts	123
Table 4.2 Observed sea-level rise, and estimated contributions from different sources	125
Table 4.3 Impacts of excessive groundwater withdrawal	131
Table 4.4 Linkages between state changes in aquatic ecosystems and environmental and human impacts	138
Table 4.5 Selected responses to water issues addressed in this chapter	152

Chapter 5 Biodiversity

Table 5.1 Impacts on biodiversity of major pressures and associated effects on ecosystem services and human well-being	169
Table 5.2 Biodiversity benefits to agriculture through ecosystem services	172
Table 5.3 Energy sources and their impacts on biodiversity	179
Table 5.4 Impacts of loss of cultural diversity	183

Chapter 6 Sustaining a Common Future

Table 6.1 Key regional priority issues selected for GEO-4	203
Table 6.2 African countries with 5 per cent or more of their land affected by salinization	209
Table 6.3 Health and economic costs of PM ₁₀ for selected cities	217
Table 6.4 Change in mangrove area by sub-region	221
Table 6.5 Threatened species by sub-region	221
Table 6.6 Adoption of EURO vehicle emission standards by non-EU countries	234
Table 6.7 Anticipated benefits of the EU Thematic Strategy on Air Pollution	235
Table 6.8 Main threats to biodiversity reported in the pan-European Region	237

Chapter 7 Vulnerability of People and the Environment: Challenges and Opportunities

Table 7.1 Estimated attributable and avoidable burdens of 10 leading selected risk factors	307
Table 7.2 Overview of archetypes analysed for GEO-4	318
Table 7.3 Some findings of the World Commission on Dams	338
Table 7.4 Links between vulnerability and the achievement of the MDGs, and opportunities for reducing vulnerability and meeting the MDGs	345

Chapter 8 Interlinkages: Governance for Sustainability

Table 8.1 Recommendations from some recent UN environmental governance reform processes	383
---	-----

Chapter 9 The Future Today

Table 9.1 Key questions related to scenario assumptions	403
Table 9.2: Progress on the MDGs across the scenarios	428

Chapter 10 From the Periphery to the Core of Decision Making – Options for Action

Table 10.1 Classification of environmental policy instruments	468
Table 10.2 Quantitative targets for Japan's 3R Policy for 2000–2010	473
