

# Guided Tour for “UNEP: Atlas of Our Changing Environment” in Google Earth:

(If you already have Google Earth installed on your computer skip to step #9.)

## **To download and install the Google Earth Browser:**

1. Go to the **Google** Home page <http://www.google.com/>
2. Click on the link **more >>** (below the “e” in Google)
3. Click the **even more >>** option
4. Halfway down the left hand side of the page that will open is a stylized globe - click the word **Earth** just to the right of it to open up the Google Earth page.
5. Click the link “**Get Google Earth**” in the upper right hand corner of that page.
6. You will go to a page where you can choose between the Version 3 and 4; this choice is up to you. Be sure to choose the operating system you have on your computer (just below the download link).
7. Save the program to a location on your computer.
8. Navigate to where you saved the download and double click the icon – the Google Earth install wizard will walk you through the rest.

## **If you already have Google Earth installed on your computer:**

9. Under Layers (below the green bar in the bottom left corner) click the triangle icon next to “Featured Content”
10. Click the box next to the blue UNEP icon.
11. A series of 100 icons will appear all over the globe.
12. Click any one of these once to see a “popup” with a description of the site.
13. Click the link “Overlay images on Google Earth” in the lower left corner of the popup to see the images on the Google Earth virtual globe surface.
14. (Click on the link “View more information” to go to the UNEP webpage for this site.)
