

## Step by Step for clean fleet strategy

### START HERE

Did you know that carbon dioxide emissions are the primary contributor to climate change, which will result in sea level rise of up to 88 cm, according to scientific estimates, leading to flooding of low-lying lands?

### AWARENESS

This step will introduce the issues on environment and transport. Use Tool 1 to 6.

### STEP 2

### IMPACTS

This step will assist you in making an inventory to estimate your fleet's impacts on environment and health. Use the Impact Tool

Did you know that the World Health Organisation estimates that 800,000 people worldwide die prematurely every year due to air pollution?

### STEP 3

### ACTIONS

This step will give you the options available to reduce environment and health impacts. Use Tools 7 to 15.

Did you know that the latest hybrid electric trucks emit 60 to 90% less air pollutants and use 30% less fuel compared to an average truck today?

### STEP 4

### STRATEGY

On the basis of your / TNT's overall objectives and local circumstances, develop your strategy by choosing selected actions and setting targets. Tool 16 will give you some further help.

### STEP 5

Did you know that UPS use over 1,000 CNG vehicles in the USA and that FedEx is experimenting with hybrid trucks?

### MONITORING

This step will help you keep track of the effects of your strategy and adjust it if necessary. Tool 17 will give you some further help.
