# Objectives & Expectations

## What are yours?

### Objectives UNEP for this training:

- Train public and private fleet managers in the practical use and application of the Cleaner Fleet Management Toolkit within their own institution
- Discuss opportunities to improve the environmental performance of your fleet
- Have organizations defining building blocks that are relevant for your clean fleet strategy

### Expectations

- Public and private fleet managers use their fleet specific data to begin development of cleaner fleet strategies during training
- Increased awareness of cleaner fleet solutions and available UNEP support in this area
- Exchange of opinions and ideas from all participants as they can be useful for the other organizations as well
