

Presentation Working Group 1

Priority Issues

- Monitoring and control system for FQ
 - Increase mobile monitoring equipment
 - Train the staff for sampling and testing when there is new equipment
 - Institutional framework – appointment of a body with equipment (computer, software, calibration, maintenance – often forgotten)
 - Information dissemination
 - Sharing existing national and international info

Overall Responsibilities on FQ Control

- Get copies of recommendations and procedures for FQ monitoring that already existed
- Spread list of participants
- Initiate projects including FQM issues and apply to financial sources including internal ones

Effective Control on Vehicle Emissions

- Develop implementation programme for respective EU Directives – inventory of existing problems, precise financial calculation
- Presentation of implementation programme in front of commission – can help candidate countries during negotiation
- Good annual measurements and regular control on vehicle emissions
- Increase the number of ad hoc checks
- Monitoring stations
- Ask for additional financial support
- Equip technical inspections with all increasing tools and equipment for emissions testing

Financial Incentives

- For modification the existing financial incentives to support the clean fuels and vehicles
- Exchange the experience, practice between countries
- Introduce the new financial incentives by the government for buying new vehicles

Creation of New Standards on Fuel Quality

- Deadlines
- Implementation
- According to specific content
- Transition periods - based on analysis (what, why, how)
- Identify obstacles/barriers
- Plans to overcome the barriers
- Develop national standards and Rulebook for standard implementation
- Raising of awareness on the new FQ standards

- Safe disposal of lead petrol equipment – simple melting is not applicable, effective disposal is expensive, proper procedure – companies, funding, international initiative for that

Ideas for Follow up Steps

- Upload all documents on www (REC, UNEP/PCFV)
- Create a process where process is going to be done
- There are opportunities (VROM, PCFV, USEPA) but we need to be clear on objectives
- Spread the message on the specific needs of the region
- Encouragement for participants to join the PCFV
- Role of PCFV – technical advice, small financial support, information tools, etc.
