

“Time for Action”

Lyrics: Deborah Woodson

Music: Martin Ernst

© 2007 UNEP (United Nations Environment Programme)

Young people of the world
From every land
Today we come together
Sharing strong beliefs and plans

For nature's beauty
Gardens of green
under azure skies
Where the air is fresh and clean

We're sending our message, to nations near and far
It doesn't take a genius to see what's in our hearts

**Now it's the time for action
Its time for moving on
Now it's the time for affection
A new day has begun**

**Now it's the time for action
Let's treat mother earth with care
Now it's the time for reflection
With so much good to share**

So tell your neighbors
Family and friends
That we can save the earth
The power is in our hands

We're sending our message, to nations near and far
It doesn't take a genius to see what's in our hearts

**Now it's the time for action
It's time for moving on
Now it's the time for perfection
A new day has begun**

**Now it's the time for action
Let's treat mother earth with care
Now it's the time for reflection
With so much good to share**

Time for action
United as one
Nature's new horizons, are waiting to be found
Zestfully we plant the seeds that make our future bright
And every single living thing is basking in the light
